Enhance your product through embroidery.
Machines with excellent durability, which offer
the high quality embroidery demanded by top brand names.

The outstanding quality and durability of industrial embroidery machines, condensed into a compact body.
Bring color to your business with SAI, the model that offers high quality finishing with production power.

Functional beauty from industrial designer Toshiyuki Kita

Having been active since 1969 producing designs in both Italy and Japan, Kita has been the design force behind a huge number of popular pieces of furniture, home appliances, robots, and everyday domestic items produced by Italian, German, and Japanese manufacturers. Many of his works are featured in the permanent collections of such galleries as the Museum of Modern Art in New York. Winner of the 2011 ADI Compasso d'Oro International Award in Italy.

Capable of professional quality finish using 8 colors.

With SAI, it is possible to embroider designs with threads of up to 8 colors, just like that. Its layout makes it easy to change threads. With a structure that inherits the high performance of industrial embroidery machines, fine lines and wide areas can also be beautifully embroidered.

Easy operation using a touch panel

Even those new to the art of embroidery will quickly pick up on how to use the touch panel to prepare the machine to embroider.

Exceptionally fast

SAI can complete 800 stitches a minute. It can maintain this high speed during stitching.

Lettering and editing software "TAJIMA Writer"

Data for monogramming can be combined with pre-existing embroidery data using TAJIMA Writer. Connect SAI to your computer using a network, and Writer will send the embroidery data directly to SAI.
* TAJIMA Writer is compatible with 64 bit versions only of Windows 7 or later.

Lettering can be selected on the operation panel

Enter the letters on the operation panel, the embroidery data can be generated on the machine.
There are 3 different sizes for each font.

Fonts selectable from the touch panel
